*Flexible Gas Piping by OmegaFlex®*

Improve your bottom line by taking advantage of TracPipe® CounterStrike® industry-leading flow capacities.

### CONTACT INFORMATION

1.800.671.8622

[sales@tracpipe.com](mailto:sales@tracpipe.com) • [www.tracpipe.ca](http://www.tracpipe.ca)

OmegaFlex, TracPipe, CounterStrike and AutoFlare are registered trademarks of OmegaFlex, Inc.

### Four Decades of Performance

Since 1975, OmegaFlex has led the piping industry with its high-quality construction and commitment to exceed the industry's product and safety standards.

- With over 100 patents, OmegaFlex's philosophy is not to wait for mandates, but to lead the industry by introducing the best products.
- In 1999, OmegaFlex was the first CSST manufacturer to mandate the bonding of its yellow-jacketed TracPipe® Corrugated Stainless Steel Tubing (CSST) in its installation guide.
- In 2004, OmegaFlex developed CounterStrike® CSST, which contains all of the innovative features of TracPipe® CSST plus a built-in arc resistant jacket that eliminates the need for additional bonding, subject to applicable local codes.
- In 2011, OmegaFlex became the only CSST manufacturer to transition from its highly successful yellow CSST product "TracPipe®" CSST and now only sells its innovative black-jacket product "CounterStrike®" CSST throughout the US market.
- In 2012, OmegaFlex was a sponsor of NSF-UC San Diego's earthquake testing program. The flexibility of CounterStrike® CSST withstood the worst seismic activity simulated without any failures, leaks or damage. Meanwhile black iron pipe, which was installed next to CounterStrike® CSST, fractured in the same test.

*TracPipe® and TracPipe® CounterStrike® CSST are also :*

- Listed by CSA to the national consensus standard ANSI LC-1/CSA 6.26-2016 for CSST. CounterStrike® also meets the performance requirements in the Standard for arc resistant conductive jackets.
  - Compliant with CSA B149.1 or the National Gas and Propane Installation Code including Canadian Electrical Code requirements for bonding and grounding of gas piping systems.
  - Compliant with the fuel gas codes in all 10 provinces.
  - Listed by Underwriters Laboratories (UL) for 1, 2 and 4 hour through penetration fire stop systems without removal of the protective jacket.
  - CounterStrike® has also been evaluated for lightning resistance (ER-0227) by the International Association of Plumbing and Mechanical Officials (IAPMO) Uniform Evaluation Service which is accredited by Standards Council of Canada.
- 
- The 2022 ICC-ES ESR-4565 listing represents the seismic certification by shake-table testing for CounterStrike® CSST flexible gas piping systems as an alternative to code-prescribed requirements. OmegaFlex tubing systems sustained severe earthquake simulations that surpassed all the intensities and seismic forces ever recorded as well as the design forces specified in the current building codes. The ICC seismic certifications for the three OmegaFlex products (CounterStrike®, MediTrac®, and DoubleTrac®) are consistent with the technical requirements of the major US seismic codes and standards including: International Building Code, the ASCE-7 Standard, FEMA 461 as well as the City of Los Angeles Department of Building Safety, and the State of California Division of State Architect and OSHPD.

*CounterStrike® CSST in seismic test rig.*

## Flexible Gas Piping CSST

### CounterStrike® CSST Piping Systems for Natural Gas and Propane

The flexibility and long lengths of CounterStrike® CSST make it perfect for remodel/repair work. It can be pulled like wire, which minimizes the need to remove and replace walls, while at the same time potentially reducing both construction cost and shortening lead times.

CounterStrike® features a single robust protective jacket over a non-annealed CSST, which offers enhanced crush resistance. The superior crush resistance of CounterStrike® CSST means that it lays straighter, is simpler to cut and pulls easier in new home construction.

# AutoFlare® Fittings and Accessories

## Self-Flaring Fitting

AutoFlare® is the self-piloting fitting that attaches TracPipe® CounterStrike® to traditional gas fittings and appliances. No special tools or additional parts required.

# TracPipe® PS-II Underground Gas Piping

## TracPipe® PS-II Underground Gas Piping PATENTED

**TracPipe PS-II** is a pre-sleeved gas installation system for underground, rooftop, or exterior wall applications that is more cost-effective and easier to install vs. our original **TracPipe PS** system.

Description	Part Number	Size	Reel Length	Lb./ Reel
<b>TracPipe PS-II 3/8"</b>	<b>FGP-UGP-375-250</b>	3/8"	250 ft./reel	57.5
<b>TracPipe PS-II 1/2"</b>	<b>FGP-UGP-500-250</b>	1/2"	250 ft./reel	82.5
<b>TracPipe PS-II 1/2"</b>	<b>FGP-UGP-500-100</b>	1/2"	100 ft./reel	33
<b>TracPipe PS-II 3/4"</b>	<b>FGP-UGP-750-250</b>	3/4"	250 ft./reel	107.5
<b>TracPipe PS-II 3/4"</b>	<b>FGP-UGP-750-100</b>	3/4"	100 ft./reel	43
<b>TracPipe PS-II 1"</b>	<b>FGP-UGP-100-250</b>	1"	250 ft./reel	142.5
<b>TracPipe PS-II 1"</b>	<b>FGP-UGP-100-100</b>	1"	100 ft./reel	57
<b>TracPipe PS-II 1 1/4"</b>	<b>FGP-UGP-125-150</b>	1 1/4"	150 ft./reel	137
<b>TracPipe PS-II 1 1/2"</b>	<b>FGP-UGP-150-150</b>	1 1/2"	150 ft./reel	150.5
<b>TracPipe PS-II 2"</b>	<b>FGP-UGP-200-150</b>	2"	150 ft./reel	220

### Male Adapters

Male Adapter

Description	Part Number	Size	Pkg. Qty.	Lb.
<b>TracPipe PS-II Male Adapter</b>	<b>FGP-UGF-375</b>	3/8" NPT Male	25/box	.45
<b>TracPipe PS-II Male Adapter</b>	<b>FGP-UGF-500</b>	1/2" NPT Male	20/box	.50
